EDUCATION

Carnegie Mellon University

2018 – present

PhD in Robotics, School of Computer Science (GPA: 4.2/4.0)

Advised by Professor Abhinav Gupta

Relevant Courses: Deep RL for Robotics (16-881), Deep RL (10-703), Math for Robotics (16-811)

Massachusetts Institute of Technology

2013 – 2017

Bachelor of Science, Computer Science and Engineering

Relevant Courses: Autonomous Vehicles (2.166), Computer Vision (6.819), ML for Healthcare (6.S897)

NLP (6.806), Performance Engineering (6.172), Inference (6.008), Undergraduate Research (6.UAR)

RESEARCH AND INDUSTRY EXPERIENCE

Waymo, Machine Learning Research Resident

2017 – 2018

Combined imitation learning with reinforcement learning for better trajectory generation. Designed and deployed a low-latency text detection and recognition system that runs on the Waymo fleet.

MIT Computer Vision Group, Undergraduate Researcher

2015 – 2017

Worked with Professor Antonio Torralba and Carl Vondrick on training deep models to exploit underused signals present in videos, including visual dynamics and audio.

Deep Genomics, Research Intern

Summer 2016

Explored deep learning use on genomic data. Developed a CNN for an RNA pattern recognition task that gave a 1.2x improvement in sensitivity above baselines. Authored a paper, which won 2nd best presentation at the Machine Learning for Computational Biology workshop at NeurIPS 2016.

Counsyl, Computational Biology Research Intern

Summer 2015

Developed an analysis pipeline for a liquid biopsy that reconstructs a tumor's genome from circulating tumor DNA in the bloodstream. Used statistics and signal processing techniques to reduce sequencer and polymerase noise by 1000x.

Google, Software Engineering Intern

Summer 2014

Designed and implemented a distributed video analysis system for finding coherent animated clips in YouTube videos. Launched the system internally, allowing all Google employees to test out the project.

FIRST Robotics Team 1700, Programming Lead, Coach

2009 – 2014, 2018

Mentored all-girls high school robotics team, Castilleja Gatorbotics. Previously as a student, developed PID controllers and image tracking to identify and automatically aim at basketball hoops.

UC Santa Cruz Astronomy Research Internship

Summers 2011, 2012

Conducted research with Professor Raja Guhathakurta to develop pattern matching software to search spectra for distant galaxies. Wrote paper and presented at the 2013 American Astronomical Society conference.

PUBLICATIONS

- V. Dean**, A. Delong, B.J. Frey. Deep Learning for Branch Point Selection in RNA Splicing. Selected for oral presentation at the Machine Learning for Computational Biology workshop at NeurIPS 2016. Also a poster at the Women in Machine Learning Workshop at NeurIPS 2016.
- V. Dean**, P. Guhathakurta, et al. Search for High-Redshift Lyman-Alpha Emitters in the DEEP3 Galaxy Redshift Survey. Poster presented at the 2013 American Astronomical Society meeting.
- K. McCormick, A. Alvarez-Buylla, **V. Dean**, et al. Semi-automated Search For Lyman-alpha And Other Emission Lines In The DEEP2 And DEEP3 Databases. Poster presented at the 2012 American Astronomical Society meeting.

HONORS AND AWARDS

Cisco Undergraduate Research and Innovation Scholar	2015 – 2016
2nd Place Oral Presentation at NeurIPS Machine Learning in Computational Biology Workshop	2016
Dropbox Engineering Prize at Stanford TreeHacks	2015
Winner of MIT Education DesignShop	2014
Intel Science Talent Search Semifinalist (One of 300)	2013

TEACHING AND OUTREACH

OurCS , Committee Member	Summer 2019
Co-organizing 3-day workshop providing research opportunities to undergrad women from around the world.	
CMU SCS4ALL PhD Initiative , Committee Member	2019
Representing The Robotics Institute on committee with the aim of making SCS more diverse and inclusive.	
CMU AI mentorship program , Organizer	2018 – 2019
Founded program and paired 39 undergraduates who are underrepresented in AI with PhD student mentors.	
Introduction to Deep Learning (6.S191) , Lecturer and Co-chair	January 2017
Organized and lectured for MIT's first deep learning course. My lecture on multi-modal learning has over 10,000 views on YouTube.	
MIT Global Teaching Labs , Computer Science Instructor	January 2016
Developed and taught a month's worth of curriculum on elective topics, including algorithms and machine learning, to 4th and 5th year computer science students at a technical school in Prato, Italy.	
Code for Good , Founder	2014 – 2017
Founded MIT group that connects students and nonprofits on technical projects. Since its founding, hundreds of MIT students have worked with 40+ nonprofits through a course (6.S187) and a consulting program.	
Society of Women Engineers , Board Member	2014 – 2017
Developed and taught #HelloWorld, an MIT program encouraging middle school girls to pursue CS. Now in its 9th semester, the 7-week program enables students to build websites using HTML, CSS, and JavaScript.	
Introduction to EECS (6.01) , Student Lab Assistant	Spring 2014
Led MIT students through course labs on topics ranging from probability to PID control on real robots.	

INVITED TALKS/PANELS

Duke Technology Scholars Program Fireside Chat	June 2019
Castilleja Global Week AI Panel	January 2019
Program in Quantitative Genomics Working Group Series at Harvard School of Public Health	April 2018
MIT Women in EECS Tech Talk	April 2017

TOOLS

Proficient:	Python	C/C++	Java	Tensorflow	Keras
Familiar:	MATLAB	Torch	PyTorch	Caffe	ROS

OUTSIDE INTERESTS

Experimental baking, swing dancing, reading, and rowing (NCAA Division I, MIT 2017-2018).
